NARWAL AUTH API DELIVERABLE 10

**MUHAMMAD NASEEM
SAMI NAEEM
KYNAT MANSHA**

API Dashboard

Our Narwal Auth API Dashboard serves as a centralized platform designed to manage and interact with the Narwal Auth API. It equips developers with essential tools and resources to seamlessly integrate secure authentication features into their web applications.

Key Features

- **API Integration Guide:**
 - We provide a step-by-step integration guide tailored for your website.
 - Includes installation of necessary dependencies and practical code examples for seamless interaction.
 - Demonstrates functions for generating challenges and verifying authentication.
- **Service Management:**
 - Easily enable or disable the API service directly from our dashboard.
 - Monitor the current service status (enabled or disabled) at a glance.
- **API Package Download:**
 - Access our comprehensive API package, encompassing detailed documentation and practical examples.
 - Facilitates a deeper understanding of the API's capabilities and usage scenarios.

Target Audience

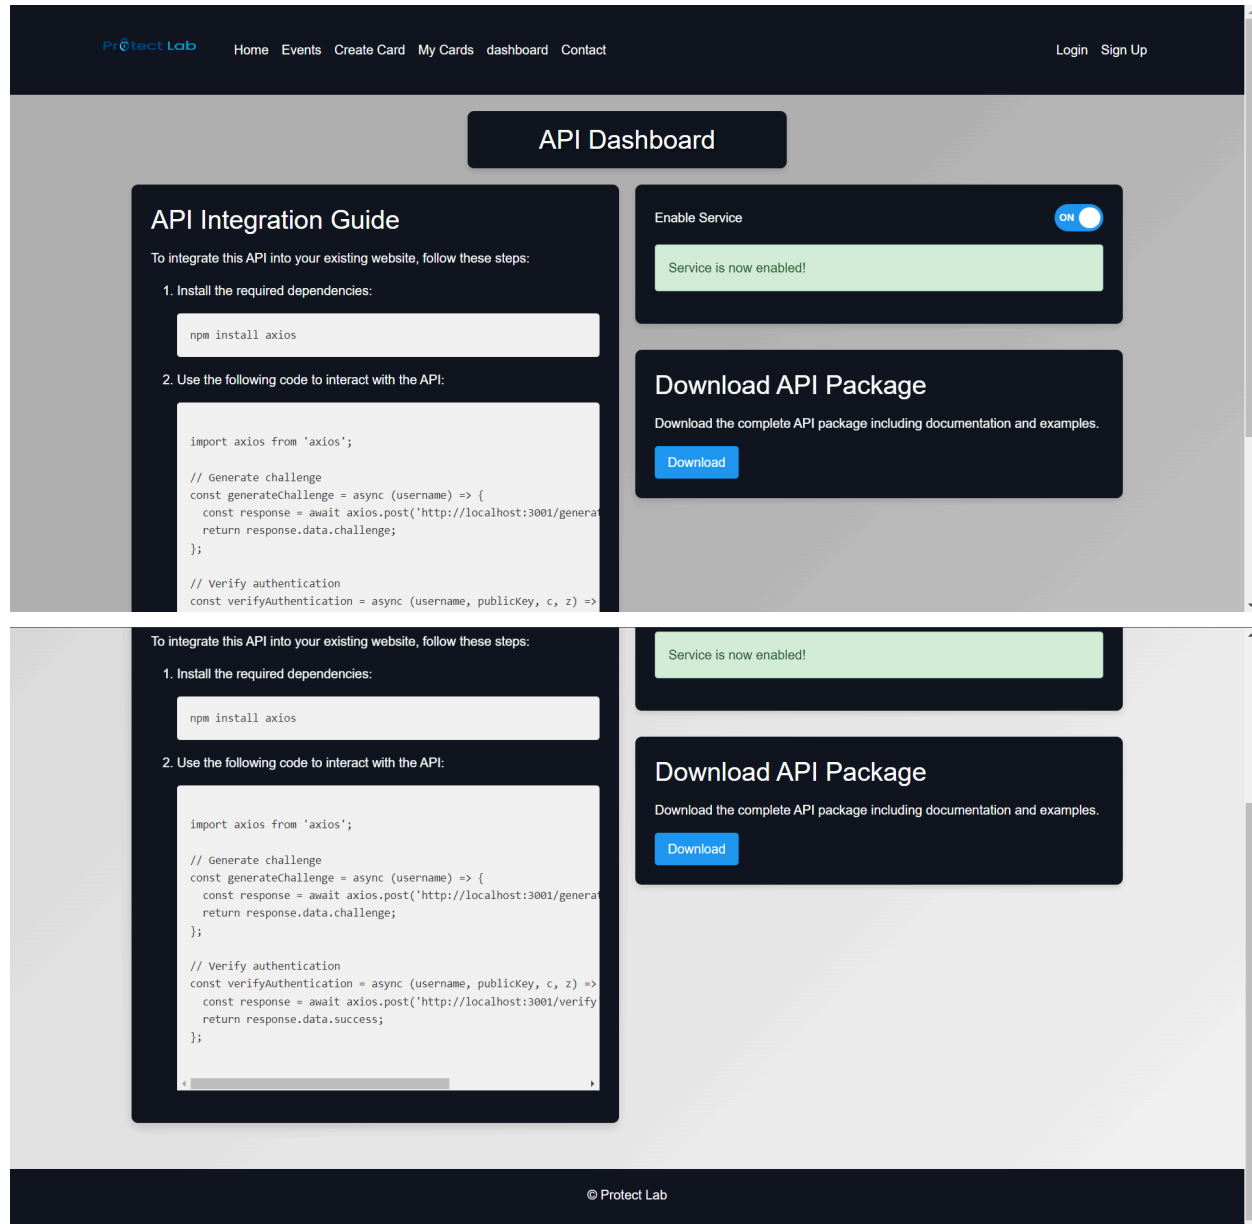

Our Narwal Auth API Dashboard caters to developers seeking to enhance their web applications with robust authentication features.

Getting Started

To begin leveraging the Narwal Auth API through our dashboard, follow these initial steps:

1. **Sign Up:** Create your account on our Narwal Auth platform.
2. **Explore the Dashboard:** Familiarize yourself with the features and functionalities offered by our dashboard.
3. **Integrate the API:** Utilize our integration guide and the provided code examples to seamlessly integrate the API into your website.
4. **Download the API Package:** Access our comprehensive API package to explore detailed documentation and practical examples.
